

Antelope Cobra Link - Fiber Conversion

Antelope Cobra Link

Antelope Cobra Link - Fiber Conversion

KEY FEATURES

- Video, audio, data and power over one single SMPTE cable
- Two HD SDI signals from camera to base
- Long distances - multiple kilometres

The Cobra Link Fiber System is a small form factor broadcast transmitter. It transmits video, audio, data and power over a single field SMPTE hybrid fiber cable.

Cable distances up to 3km can be achieved due to highest quality power supplies implemented in base and camera unit.

The Cobra Link is specially designed for highspeed camera systems outputting two 3G HD-SDI video signals, nevertheless it performs excellent in all other professional broadcast applications.
