

HD COLOR VIEWFINDER

AJ-CVF25GJ

KEY FEATURES

- Higher resolution (approx. 2,760,000-dot) and lighter with newly developed LCD
- LCD direct viewing, and image can be automatically / manually reduced (83%) when flipping up its eyepiece
- Robust body and same layout of dial and switches as conventional EVF
- Back tally lamp (ON/OFF by lever)
- Supports studio camera use: adding Yellow Tally in the display panel

The AJ-CVF25GJ electronic viewfinder is designed to mount on a shoulder ENG camera recorder or studio camera.

It is equipped with a newly developed 3.45-type LCD panel (approximately 2,760,000 dots) that offers high contrast and brightness and boasts three times higher pixel density, thus realizing more precise and easier focusing.

The AJ-CVF25GJ can be opened (flip-up type) at either of two positions, the lens barrel or the front side of the LCD panel. Furthermore, the image can be displayed in a reduced size (83%) automatically or manually when the eyepiece is opened.

The image adjustment dial and other controls are laid out in the same pattern as on a conventional viewfinder for ENG camcorders. The back tally (with slide cover switch) is provided at the location where only the operator can see. Furthermore, the AJ-CVF25GJ is provided newly with a yellow tally that can be used in live recording with a studio camera, thus ensuring a comfortable video recording experience.
